Table Questions in the House of Assembly from MHA Lorraine Michael

Question 10:

In relation to the proposed long-term care and acute care hospital in Corner Brook, what are the financing rates that were assumed with respect to each of the procurement options?

Response:

Mr. Speaker, on April 5, 2017, the member opposite (MHA Michael) tabled the following question in this House: In relation to the proposed long-term care and acute care hospital in Corner Brook, what are the financing rates that were assumed with respect to each of the procurement options?

Mr. Speaker, information regarding financing interest rates will be provided as part of the full value for money assessment when a successful proponent has been identified.

This is consistent with practices in other jurisdictions so as not to influence bids from potential proponents.
