Primary Clients

The clients of the Wooddale Land Development Advisory Authority are members of the general public who apply to develop land in the Wooddale (Agriculture) Development Area.

Vision

Through assessment of applications for opportunities to develop land in the Wooddale Agricultural Development Area, the Wooddale Land Development Advisory Authority contributes to the vision of the Department of Natural Resources, stated as follows:

“The vision of the Department of Natural Resources is a province that is realizing the full benefit from the sustainable development of its natural resources.”

Mission

The mission statement is the priority focus area of a public body over its planning cycle. It represents the key longer term result that the public body and the responsible minister will work towards to achieve a component of government’s strategic directions. The statement also identifies the measures and indicators that will assist a public body and the public in monitoring and evaluating success.

The Wooddale Land Development Advisory Authority has determined that an applicable mission statement would be unduly repetitive of its mandate. It has opted to forgo development of a mission statement at this time.

The Wooddale Land Development Advisory Authority considered its role in assisting the Forestry and Agrifoods Agency in achieving its mission for the planning period. The Authority has a role in identifying and facilitating opportunities for agricultural and agrifoods resource development and diversification by making recommendations on applications for land development in the Wooddale Development Area in consideration of direction under the regulations to ensure development is consistent with agricultural purposes. As such, aspects of the following general statement from the mission of the Agency related to agriculture and agrifoods sectors apply to the Authority:

“By March 31, 2011, the Forestry and Agrifoods Agency will have: implemented programs necessary to sustain the province’s forest ecosystems; identified and facilitated further opportunities for sustainable agriculture and agrifoods resource development; and optimized the benefits received from these resources.”

Whereas the purpose of the Wooddale Agriculture Development Area is to protect agriculture land, the Wooddale Land Development Advisory Authority’s review of development applications is consistent with the mission of the Forestry and Agrifoods Agency as it relates to sustainable resource management.

The Authority has determined that it has no material impact on achievement of measures and indicators of the Forestry and Agrifoods Agency's mission statement.

The complete mission of the Forestry and Agrifoods Agency is found in its Strategic Plan for the period covering April 1, 2008 to March 31, 2011.

Appendix A Strategic Directions

Strategic directions are the articulation of desired physical, social or economic outcomes and normally require action by more than one government entity. These directions are generally communicated by government through platform documents, Throne and Budget Speeches, policy documents and other communiqués. The Transparency and Accountability Act requires departments and public bodies to take into account these strategic directions in the preparation of their performance-based plans. This action will facilitate the integration of planning practices across government and will ensure that all entities are moving forward on key commitments.

The Wooddale Land Development Advisory Authority considered the Strategic Directions of the Minister responsible for the Forestry and Agrifoods Agency in preparation of its April 1, 2008 to March 31, 2011 Activity Plan.
